Overview

A good grounding in basic skills, knowledge and understanding of common engineering practices, along with a grasp of safe working practices, are essential for anyone seeking to build a career in engineering and/or manufacturing.

Who would benefit from this qualification?

This qualification is primarily aimed at candidates who perform a general engineering role and recognises that employment in the engineering sector involves a diverse range of functions, tasks and activities that are constantly developing and changing.

It is suitable for candidates who perform a range of engineering activities including :

- Machining
- Welding
- Operating CAD
- Electronics

Course Content

- Working safely in an engineering environment
- Working efficiently and effectively in engineering
- Using and communicating technical information

In addition they will also have to complete 3 units from a list to suit the chosen field of engineering.

Entry Requirements:

There are no formal entry requirements for candidates undertaking this NVQ, however employers must ensure that candidates have the potential and opportunity to gain evidence for the qualification in the work place.
